

UNITED STATES OF AMERICA INCOME DISCLOSURE STATEMENT

This Income Disclosure Statement (IDS) is a reflection of WIN Worldwide’s rewarding opportunity as reflected by our activity from May 2015 - April 2016, just one year into the official launch of the new WIN Worldwide. The information contained herein shows the percentages and earnings of all Brand Partners who wish to purchase and use products, and of those who wish to earn income.

WIN Worldwide is comprised of three different groups: Customers, Discount Partners and Business Builders. **Customers** purchase products either at retail or who, as Smart Shoppers, get a guaranteed low price via a regular monthly order. Discount Partners and Business Builders signed a Brand Partner Agreement and have the right to buy the products at wholesale and sell them at retail. The average earnings of all Brand Partners during the reporting period is \$433.38. **Discount Partners** typically purchase products for personal consumption and their family and friends without developing a downline to generate residual income. **Business Builders** have developed a stable base of customers, along with a downline sales organization, in an effort to generate residual income. During this reporting period, 66.98% of our Brand Partners were considered Discount Partners and 33.02% were considered Business Builders. While Brand Partners are not required to purchase products or carry inventory to earn commissions with WIN, Discount Partners had an average monthly purchase of \$106.54 and Business Builders had an average monthly purchase of \$141.55 during the period. In the below chart, we have disclosed further details of the Brand Partners who are Business Builders.
